PROJECTS

Happy Hour

Java / Spring Boot / AngularJS / MySQL / Cloud Foundry / Google Maps API

Collaborative project that allows users to find Denver's best happy hours by neighborhood or restaurant.

Jamazon

WebRTC / Node.js / Express / PostgreSQL / Knex.js / Google OAuth2 / Pivotal Tracker / Agile Workflow / Bootstrap / HTML5 / CSS3

Collaborative project that allows users to engage in a virtual jam session. Set up live video/audio streaming use a WebRTC framework. Established the Express routes and Knex queries.

Bebop.

Materialize / JavaScript / jQuery / Bandsintown API / HTML5 / CSS3

Webb app that allows users to search for concerts related to an artist or band of their choice. Utilized Bandsintown API and material design cards to provide users with concert info in a sleek format.

Cherry Creek Winery

Web Design / Bootstrap / HTML5 / CSS3

Overhauled an existing vineyard/winery website, providing users with a much more streamlined, intuitive experience.

Kanye Kitty

JavaScript / API / HTML5 / CSS3

Collaborative hackathon project that generates Kanye West Quotes from 'Ye PI API and random pictures of kittens from Giphy API.
